I. INTRODUCTION

In response to Plaintiff John Stossel’s (“Stossel”) Complaint, Defendant Science Feedback (“Science Feedback”) has filed a Motion to Dismiss and Special Motion to Strike Complaint under California’s Anti-SLAPP Statute (“Motion”), which argues that a Rule 12(b)(6) standard applies¹ and that Stossel failed to plead a prima facie case of defamation.

Science Feedback and Defendant Meta Platforms, Inc. (“Meta”) act in partnership to conduct what they describe as “fact-checks” of content posted by Facebook users. Science Feedback tells the public that its job is to “sort fact from fiction,” while Meta announces that its “fact-checking program” focuses on “provably false claims.” Yet Defendants ask this Court to characterize their “fact-checks” of Stossel’s reporting as opinion.

Had Defendants transparently told the public what they now argue in court — that Defendants were not claiming to evaluate Stossel’s work for factual accuracy, but instead were simply expressing “a disagree[ment] on scientific opinion” (Motion at 24) — this lawsuit would not have been filed. Instead, Defendants announced to Facebook’s 2.9 billion users that Stossel’s news reports had been subjected to fact-checks, and failed. In one instance, Defendants labeled Stossel’s reporting “misleading” based on a dubious claim he never made, in a video Science Feedback’s reviewers never watched (the Fire Video). In a second instance, Defendants labeled Stossel’s report “partly false” despite knowing that it contained not a single false fact (the Alarmism Video). As the publicly-designated partner in fact-checking for the largest social networking site in the world, Science Feedback’s declarations of fact carry an imprimatur of authority, and the black marks it placed on Stossel’s reporting caused Stossel significant reputational and financial injury.

Stossel freely acknowledges that Defendants have the right to disagree with him about complex and unresolved scientific matters, and to voice opinions that are different from his own. What Defendants may *not* do, is put words in Stossel’s mouth and tell the public his reporting is false as a

¹ See Motion at 11 (“In federal court, where no discovery has occurred, [the probability of prevailing] standard requires the plaintiff to satisfy the pleading standards under Rule 12(b)(6).” (citing *Planned Parenthood Fed’n of Am., Inc. v. Cntr. for Med. Progress*, 890 F.3d 828, 834 (9th Cir. 2018))).

1 matter of fact, when what they actually mean is that they have a disagreement with him. Stossel amply
2 states a claim for defamation on these facts.

3 None of Science Feedback’s legal defenses change this result. While Science Feedback
4 acknowledges that a Rule 12 standard applies, it improperly attempts to introduce extrinsic evidence to
5 color the Court’s view of Stossel and his reporting — for example, to argue that its lies about Stossel’s
6 journalism were not disparaging because of Stossel’s supposed “pre-existing notoriety for posting
7 controversial subject matter,” found nowhere in the four corners of the Complaint. Motion at 14.
8 Stripped away of these tactics, Science Feedback’s defenses fail in light of the well-pled facts and law.
9 Nor can Science Feedback seek refuge in California’s Correction Statute, which by its terms patently
10 does not apply to Science Feedback’s website, and where Stossel has pled both timely demand for
11 correction and special damages, in any case.

12 As Science Feedback’s legal defenses are unavailing and Stossel’s Complaint clearly pleads
13 sufficient facts to state a plausible defamation claim, Stossel respectfully requests that the Motion be
14 denied in full.

15 **II. BACKGROUND**

16 **A. THE PARTIES**

17 Stossel is a well-respected, award-winning career journalist and reporter who publishes weekly
18 news videos on social media, primarily on the social networking service Facebook, which is operated
19 by Meta. Compl. ¶¶ 23–24. Defendant Science Feedback is a French Association Déclarée and
20 describes itself as a “a worldwide network of scientists sorting fact from fiction in science based media
21 coverage.” *Id.* ¶ 25. Defendant Climate Feedback is alleged to be a subsidiary of Science Feedback (*id.*
22 ¶ 26), though the record now confirms that it is actually just a website exclusively owned and
23 controlled by Science Feedback. Dkt. No. 43. at 2.

24 Meta contracts with Science Feedback to “fact-check” content posted by Facebook users.
25 Compl. ¶ 108. Meta tells its users that it has a “fact-checking program” and that its “partners prioritize
26 provably false claims.” *Id.* ¶ 30. Defendants jointly developed the defamatory content that is at issue in
27 this case. *Id.* ¶ 107. For example: Meta commissions the fact-checking, and applies content, labels, and
28 other information developed by fact-checkers to its users’ speech. *Id.* ¶ 27. Meta intends that viewers

1 read the fact-checkers' content before reading or sharing the content being fact-checked. *Id.* ¶ 34. Meta
 2 takes action so that content with certain fact-checking ratings are viewed by significantly fewer
 3 people. *Id.* ¶ 35. Meta also restricts pages and websites that share "misinformation." *Id.* ¶ 36.

4 **B. THE FIRE VIDEO**

5 On September 22, 2020, Stossel published on his Facebook page a short news video entitled
 6 "Government Fueled Fires" (the "Fire Video"). *Id.* ¶ 37. In the Fire Video, Stossel discussed the forest
 7 fires that were ravaging California in 2020, and reported on several reasons cited by politicians,
 8 scientists, and environmentalists as the cause of the fires. *Id.* ¶ 38. The Fire Video explored two causes
 9 of forest fires: climate change, and the buildup of vegetation due to government policy. *Id.* ¶ 39. In the
 10 Fire Video, Stossel repeatedly acknowledged that climate change plays a role in forest fires. *Id.* ¶ 40.
 11 He cited data from the Western Regional Climate Center and stated that "climate change has made
 12 things worse. California has warmed 3 degrees over 50 years." *Id.*

13 Shortly after Stossel published the Fire Video, Meta placed a label prominently over or below
 14 the Fire Video, stating, "Missing Context. Independent fact-checkers say this information could
 15 mislead people," under which was a button stating "See Why." *Id.* ¶ 45. A viewer is then directed to a
 16 page on Climate Feedback's website (the "Verdict Page"), which states: "Claim – 'forest fires are
 17 caused by poor management. Not by climate change.' Verdict: misleading" (the "Claim"). *Id.* ¶ 47. A
 18 reasonable reader who clicked through the various prompts and read the Verdict Page would and did
 19 understand Defendants to mean that Stossel had made the allegedly debunked claim. *Id.* ¶ 48. In
 20 reality, not only is the "claim" contained nowhere in Stossel's Fire Video, but the video repeatedly
 21 confirms the opposite: that climate change is one of cause of forest fires. *Id.* ¶ 49. Defendants flagged
 22 Stossel's reporting as failing a "fact-check" and being "misleading" and "missing context," based on
 23 their false attribution to Stossel of the statement, "climate change doesn't cause forest fires," a claim
 24 that he never made. *Id.* ¶ 53. Stossel later learned that Defendants apparently had not even bothered to
 25 watch his Fire Video before condemning it. *Id.* ¶ 58.

26 **C. THE ALARMISM VIDEO**

27 On April 17, 2021, Stossel re-published on his Facebook page another video report he had
 28 previously published in November 2019, entitled "Are We Doomed?" (the "Alarmism Video"). *Id.* ¶

78. This video questioned claims made by those who Stossel refers to as “environmental alarmists,” including claims that hurricanes are getting stronger, that sea level rise poses a catastrophic threat, and that humans will be unable to cope with the effects. *Id.* Shortly after the April 2021 re-publication of the Alarmism Video, Meta placed a label prominently over the video, stating “Partly False Information. Checked by independent fact-checkers,” under which was a button stating “See Why.” *Id.* ¶ 83. If a user clicks through, she is directed to a page on Climate Feedback’s website captioned “[v]ideo promoted by John Stossel for Earth Day relies on incorrect and misleading claims about climate change” (the “‘Fact-Check’ Page”). *Id.* ¶ 83. Yet the “Fact-Check” Page identified no false facts in Stossel’s report. *Id.* ¶ 86. Relying on its faulty conclusions about both of Stossel’s video reports, Meta has reduced all distribution of Stossel’s video reporting, and has limited the number of individuals who will see his content on Facebook. *Id.* ¶¶ 102–105.

III. LEGAL STANDARDS

A. MOTION TO DISMISS UNDER FED. R. CIV. P. 12(b)(6)

To survive a Rule 12(b)(6) motion, a complaint must plead “enough facts to state a claim to relief that is plausible on its face.” *Bell Atlantic Corp. v. Twombly*, 550 U.S. 544, 570 (2007). A claim is plausible “when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.” *Ashcroft v. Iqbal*, 556 U.S. 662, 678 (2009). When evaluating a Rule 12(b)(6) motion, the court “must presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the nonmoving party.” *Usher v. City of Los Angeles*, 828 F.2d 556, 561 (9th Cir. 1987). “Factual allegations must be enough to raise a right to relief above the speculative level.” *Twombly*, 550 U.S. at 555.

B. SPECIAL MOTION TO STRIKE UNDER CALIFORNIA’S ANTI-SLAPP STATUTE

To prevail on an anti-SLAPP motion to strike, “[s]ection 425.16 posits [] a two-step process for determining whether an action is a SLAPP.” *Navellier v. Sletten*, 52 P.3d 703, 708 (Cal. 2002). “First the court decides whether the defendant has made a threshold showing that the challenged cause of action is one arising from protected activity.” *Id.* “If the court finds that such a showing has been made, it must then determine whether the plaintiff has demonstrated a probability of prevailing on the claim.”

1 *Id.* For the purpose of this Motion, Stossel is not contesting that Science Feedback satisfies the first
2 prong of protected activity.

3 Under the second prong, the “plaintiff need only have ‘stated and substantiated a legally
4 sufficient claim.’” *Navellier*, 52 P.3d at 708 (quoting *Briggs v. Eden Council for Hope & Opportunity*,
5 19 Cal. 4th 1106, 1123 (1999)). “Put another way, the plaintiff ‘must demonstrate that the complaint is
6 both legally sufficient and supported by a sufficient prima facie showing of facts to sustain a favorable
7 judgment if the evidence submitted by the plaintiff is credited.’” *Id.* (internal citations omitted).

8 **IV. ARGUMENT**

9 **A. STOSSEL’S OBJECTIONS TO SCIENCE FEEDBACK’S REQUEST FOR JUDICIAL** 10 **NOTICE**

11 Science Feedback mounts a purely legal challenge, correctly pointing out that no discovery
12 has occurred and that Stossel need only satisfy the pleading standards under Rule 12(b)(6) in order to
13 defeat the Motion. *See* Motion at 11. Despite this, Science Feedback improperly asks the Court to
14 consider extrinsic evidence. Specifically, Science Feedback requests that the Court take judicial
15 notice of “a screenshot of Plaintiff’s Facebook profile page,” and “a webpage explaining Climate
16 Feedback’s review process,” which are Exhibits 3 and 6 to Science Feedback’s counsel’s declaration.
17 Request for Judicial Notice at 2.

18 Relying on extrinsic evidence and taking judicial notice of disputed matters of fact on a
19 motion to dismiss is reversible error. *Lee v. City of Los Angeles*, 250 F.3d 668, 690 (9th Cir. 2001).
20 Science Feedback relies on the incorporation by reference doctrine, Request for Judicial Notice at 1–
21 2, under which the court *may* consider documents not physically attached to the complaint if their
22 authenticity is not contested and “the plaintiff’s complaint necessarily relies on them.” *Lee*, 250 F.3d
23 at 688 (quoting *Parrino v. FHP, Inc.*, 146 F.3d 699, 705–06 (9th Cir. 1998)). Such documents “must
24 be integral to the plaintiff’s complaint and dispositive in the dispute, raising the specter that plaintiff
25 failed to incorporate them by reference in the complaint as a means of avoiding Rule 12(b)(6)
26 dismissal.” *Hotel Emps. & Rest. Emps. Loc. 2 v. Vista Inn Mgmt. Co.*, 393 F. Supp. 2d 972, 979
27 (N.D. Cal. 2005) (citations omitted). Neither Stossel’s Facebook profile nor Climate Feedback’s *own*
28

1 *description* of its review process is integral to the Complaint. The Court should therefore disregard
2 both documents in ruling on the Motion.

3 **B. STOSSEL HAS PLED A VIABLE DEFAMATION CLAIM AGAINST CLIMATE**
4 **FEEDBACK**

5 Stossel has stated a plausible defamation claim against Science Feedback, and, accordingly has
6 also “stated and substantiated a legally sufficient claim” sufficient to defeat Science Feedback’s anti-
7 SLAPP motion. *Navellier*, 52 P.3d at 708 (citation omitted). Stossel has shown that Climate
8 Feedback’s speech was defamatory in nature and “of and concerning” Stossel. While Stossel was not
9 required to plead special damages because Science Feedback engaged in defamation per se without
10 enjoying the protections of the Corrections Statute, Stossel sufficiently pleaded special damages.
11 Finally, Stossel has pleaded facts showing that Science Feedback acted with actual malice.

12 **1. Climate Feedback’s Speech Is Actionable**

13 Science Feedback argues that its speech is not defamatory because: it is not capable of
14 defamatory meaning, it is protected opinion, and/or it is substantially true. Each defense falls apart
15 under an examination of what Science Feedback is actually alleged to have said about Stossel, and in
16 what context, as opposed to how Science Feedback selectively and misleadingly describes its speech.

17 **a. Science Feedback’s statements are capable of a defamatory meaning**

18 Science Feedback claims that there was nothing defamatory about attributing to a journalist an
19 inaccurate claim that he never made, or stating that his reporting contained falsehoods when it did not.

20 Motion at 13–14. Yet “[f]alse attribution of statements to a person may constitute libel, if the
21 falsity exposes that person to an injury contemplated by the [libel] statute.” *Masson v. New Yorker*
22 *Magazine, Inc.*, 501 U.S. 496, 510 (1991) (applying California law) (collecting cases). And if a
23 “statement is reasonably susceptible of a defamatory interpretation . . . it is for the jury to decide
24 whether a defamatory meaning was in fact conveyed to the listener or reader.” *Kahn v. Bower*, 232
25 Cal. App. 3d 1599, 1608 (1991), *reh’g denied and opinion modified* (Sept. 6, 1991) (citations omitted).

26 Stossel has pled sufficient facts for the jury to decide whether Science Feedback’s statements
27 about the “misleading” and “partly false” nature of his journalism are defamatory to him, as a career
28 journalist. The statements falsely accuse Stossel of making a claim that he did not make and that his

viewership immediately recognized as lacking credibility, and of deceiving readers by including false facts in his reporting. The Complaint alleges that these statements have caused irreparable damage to Stossel's professional reputation and business, including by causing existing viewers to believe that Stossel's reporting is biased and unfair. Compl. ¶¶ 54, 62 at p. 11, n.7 (video at 0:21 seconds: "SHAMEFUL John had all due respect for you till now! What happened to you!!?? Your NEWSWORTHY reporting was always neutral fair to both side[s of] the story was always on mark TILL NOW?!?!?...you['re] SC Fires story was SO RIGHT SIDED UNFAIR even FB tagged it."); *see also id.* ¶ 54 (summarizing negative feedback Stossel received). "[S]tatements [that] either explicitly or implicitly call[] into question [the plaintiff]'s professionalism as a journalist . . . are capable of a defamatory meaning and could reasonably be understood in a defamatory sense." *Houlahan v. Freeman Wall Aiello*, 15 F. Supp. 3d 77, 82 (D.D.C. 2014). As harmful as accusations about a journalist's professionalism may be, attacks on a journalist's credibility and veracity are even more damaging. This element is amply met.

b. Science Feedback's statements are not protected opinion based on disclosed facts

Stossel wholeheartedly agrees with Science Feedback that in evaluating whether a statement is protected opinion, "[c]ontext is key." Motion at 14. The context in this case forecloses a protected opinion defense for a simple reason: Science Feedback told its readers that its statements about Stossel were statements of *fact*, as part of Science Feedback's mission to "sort[] fact from fiction." Compl. ¶ 25.

This conclusion is supported by an application of the reasoning discussed in each of the authorities cited by Science Feedback. *Partington v. Bugliosi* held that "when an author outlines the facts available to him, thus making it clear that the challenged statements represent his own interpretation of those facts and leaving the reader free to draw his own conclusions, those statements are generally protected by the First Amendment." Motion at 14 (*citing Partington*, 56 F.3d 1147, 1156–57 (9th Cir. 1995)). *Partington* further held that statements are protected when "read in context, they are not statements implying the assertion of objective facts but are instead interpretations of the facts available to both the writer and the reader." *Partington*, 56 F.3d at 1156–57. As Science Feedback notes, the *Partington* court held that because a book about a murder case "outlines [the

author’s] own version of what took place, a reader would expect him to set forth his personal theories about the facts of the trial and the conduct of those involved in them.” Motion at 15 (*citing Partington*, 56 F.3d at 1153). The opposite context exists in this case: far from “making it clear” that their fact-checks represented their conflicting opinions about the data, Defendants told the Facebook public that their statements reflected determinations of objective fact and were the product of a “fact-checking program” that “prioritize[s] provably false claims.” Compl. ¶ 30.

Science Feedback’s reference to *Moldea v. New York Times Co.*, 22 F.3d 310 (D.C. Cir. 1994) is equally destructive to its protected opinion defense. In *Moldea*, the court considered a *New York Times* book review that was alleged to defame the book’s author. Critically — and as Science Feedback misleadingly omits from its discussion — the court noted the “[r]elevance of the [b]ook [r]eview [c]ontext” in the protected opinion analysis, stating that it “involves a context, a book review, in which the allegedly libelous statements were evaluations quintessentially of a type readers expect to find in that genre.” *Moldea*, 22 F.3d at 315. The court continued, “[t]he challenged statements in the Times review consist solely of the reviewer’s comments on a literary work, and therefore must be judged with an eye toward readers’ expectations and understandings of book reviews.” *Id.* at 315. It was within the book review context that the court discussed the “breathing space” that Science Feedback raises.

The present context could not be more different. Defendants were not in the business of reviewing books — they were in the business of “sorting fact from fiction” and “prioritiz[ing] provably false claims.” Compl. ¶¶ 25, 30. Their readers — the Facebook public — neither understood nor expected that Defendants’ labels of Stossel’s work were their own opinions, critically because *Defendants themselves* said the opposite was true. No literary criticism “breathing space” exists in this context. Science Feedback’s declaration that its self-described fact-checks are really nonactionable “feeling[], belief[], and concern[]” (Motion at 15) is patently ridiculous, as evidenced by the fact that the sole case cited in support is a two-paragraph decision holding that “statements *phrased as feelings* are protected opinion.” *County of Toulomne v. Sonora Cmty. Hosp.*, 1 F. App’x 653, 654 (9th Cir. 2001) (citation omitted) (emphasis added). The Complaint amply pleads that Science Feedback’s defamatory labels were not “phrased as feelings,” but rather as vetted fact.

Science Feedback’s reference to *Cochran v. NYP Holdings, Inc.*, 58 F. Supp. 2d 1113 (C.D. Cal. 1998) further eviscerates its protected opinion defense. *See* Motion at 16. Science Feedback argues that where “the factual referent is disclosed, readers will understand they are getting the author’s interpretation of the facts presented,” sufficient to render statements nonactionable. *Id.* at 16 (*citing Cochran*, 58 F. Supp. 2d at 1123). In *Cochran*, the “factual referent” in question was the “shared public knowledge of the trial, proceedings, theories, and underlying factual allegations” about the infamous O.J. Simpson trial. *Cochran*, 58 F. Supp. 2d at 1122–23. Thus, the average reader of the opinion piece at issue in that case had a deep prior knowledge of the matter, sufficient to allow him or her to understand that the author’s statements were opinions, not facts. By contrast here, a Facebook user who saw the “misleading” and “partly false” labels on Stossel’s report had no preexisting “factual referent” to enable her to understand that she was getting Defendants’ opinions — and what’s more, she was expressly *told by Defendants* that the labels were based on an adjudication of fact. And far from *disclosing* the factual referent (i.e., the Stossel videos) to Facebook users, Defendants intentionally reduced all distribution to Stossel’s videos after they were labeled, further obscuring any opportunity for a viewer to understand that opinions, rather than facts, were being communicated. Compl. ¶ 102.

Science Feedback’s opinion defense further fails because opinions are only protected if they are based on fully disclosed facts that are *true*. *See Standing Comm. on Discipline of U.S. Dist. Court for Cent. Dist. Of California v. Yagman*, 55 F.3d 1430, 1439 (9th Cir. 1995) (“A statement of opinion based on fully disclosed facts can be punished only if the stated facts are themselves false and demeaning”). Yet the Complaint alleges that Science Feedback’s so-called opinions were based on factual assertions that were themselves false and demeaning. Science Feedback’s “opinion” that the Fire Video was “misleading” was based on its false attribution to Stossel of a claim he never made. Science Feedback’s “partly false” label was based on the inaccurate assertion that the Alarmism Video contained “factual inaccuracies.” Thus, for this additional reason, a protected opinion defense fails.

Science Feedback’s comparison of this case to *Owens v. Lead Stories, LLC*, No. CV S20C-10-016 CAK, 2021 WL 3076686 (Del. Super. Ct. July 20, 2021), is unavailing. Motion at 16. In *Owens*, the court rejected defamation claims brought by political commentator Candace Owens when a fact-

1 checker labeled her posts after “point[ing] out factual inaccuracies” in them. *Owens*, 2021 WL
 2 3076686, at *14. By stark contrast here, Science Feedback did not and could not identify any
 3 falsehoods in Stossel’s videos. Science Feedback nonetheless applied fact-checking labels falsely
 4 accusing Stossel of making a claim he did not make, and of publishing inaccurate reporting.

5 For all of these reasons, there is no protected opinion defense available to Science Feedback.
 6 Allowing Science Feedback to hide behind this defense in the context of this case would make a
 7 mockery of the logic behind the protected opinion defense, and open floodgates for social media
 8 platforms to silence speech using false fact-checking labels with dangerous ramifications to speech on
 9 these platforms.

10 **c. Science Feedback’s statements are not substantially true**

11 The Complaint plainly alleges that Science Feedback defamed him by falsely attributing to him
 12 a claim (“forest fires are caused by poor management. Not by climate change”) that he did not make.
 13 Compl. ¶ 116. That Science Feedback put words in Stossel’s mouth is provably false; there is no
 14 “substantial truth” to it. Science Feedback’s recitations concerning the process by which its scientists
 15 conducted their analysis of particular data pertaining to the causes of forest fires do not change the fact
 16 that Science Feedback made a materially false statement by attributing to Stossel a false claim he
 17 never made, nor does Science Feedback directly address this simple reality in its Motion.

18 The analysis is equally straightforward for the Alarmism Video: Science Feedback labeled the
 19 report as “partly false” and containing “factual inaccuracies,” without identifying any false facts in the
 20 report. Compl. ¶ 86. These statements are provably false; there is no “substantial truth” to them.
 21 Science Feedback’s Motion attempts to take the Court beyond a Rule 12 standard by arguing about the
 22 conclusions it reached about underlying scientific data (while still being unable to point to any false
 23 statement in the Alarmism Video), which of course are factual issues improperly resolved at this stage.
 24 The Complaint amply pleads falsity.

25 **2. Science Feedback’s Speech Was “Of and Concerning” Stossel**

26 The Court should reject Science Feedback’s argument that attacks on Stossel’s credibility as a
 27 journalist were not “of and concerning” Stossel. Both videos were of Stossel’s reporting, were posted
 28 on Stossel’s Facebook page, included reference to his name in the bottom left corner, and were

1 understood by readers to be about his reporting. Compl. ¶¶ 37, 45 (see graphic), 54, 78, 83 (see
 2 graphic). Science Feedback’s statements referred personally to Stossel, both “by name [and] by clear
 3 implication.” *Ferlauto v. Hamsher*, 74 Cal. App. 4th 1394, 1404 (1999).

4 Science Feedback argues that it was attacking Stossel’s sources, not Stossel, relying on the
 5 Ninth Circuit’s statement that “the credibility of a journalist’s source is a separate inquiry from the
 6 credibility of the journalist himself.” Motion at 19 (citing *Newton v. Nat’l Broad. Co.*, 930 F.2d 662,
 7 683 (9th Cir. 1990)). But *Newton* is wholly inapposite because it dealt with a defamation claim *against*
 8 a journalist, who claimed to rely on information provided by a source. *Newton*, 930 F.2d at 683. The
 9 second clause of the *Newton* court’s holding (which Science Feedback ignores) is: “we apply a
 10 heightened review to the evidence regarding whether the publisher was reckless or knowingly false
 11 when he relied upon information provided by his source.” *Id.* Thus, *Newton* in no way stands for the
 12 proposition that attacks on the veracity of journalistic output are not “of and concerning” the journalist.

13 Instead, the “of and concerning” requirement “derives from the First Amendment and specifies
 14 the statement must relate to the plaintiff ‘by name or by ‘clear implication.’” *Henley v. Jacobs*, No. C
 15 18-2244 SBA, 2019 WL 8333524, at *7 (N.D. Cal. Aug. 2, 2019) (quoting *Ferlauto*, 74 Cal. App. 4th
 16 at 1404)). Courts examine whether a statement is about a “small group [with] easily ascertainable”
 17 members or about a large group exceeding twenty-five members. *Id.* (citations omitted). The “of and
 18 concerning” requirement denies recovery to “to those who merely complain of nonspecific statements”
 19 without being “identified, either expressly or by clear implication.” *Gallagher v. Philipps*, No. 20-CV-
 20 993 JLS (BLM), 2021 WL 4428996, at *20 (S.D. Cal. Sept. 27, 2021) (citing *Blatty v. N.Y. Times Co.*,
 21 42 Cal. 3d 1033, 1044 (1986)). Science Feedback’s “fact-checks” unquestionably are “of and
 22 concerning” Stossel because they imply that Stossel, a professional journalist, peddles falsehoods.

23 **3. Science Feedback Engaged in Libel Per Se**

24 The Court should reject Science Feedback’s argument that Stossel fails to allege libel per se
 25 because an attack on a journalist’s credibility and veracity is plainly libelous without any knowledge
 26 of outside fact. Under California law, the distinction between libel per se and libel per quod is
 27 statutory. *See* Cal. Civ. Code § 45a (“A libel which is defamatory of the plaintiff without the necessity
 28 of explanatory matter, such as an inducement, innuendo or other extrinsic fact, is said to be a libel on

its face. Defamatory language not libelous on its face is not actionable unless the plaintiff alleges and proves that he has suffered special damage as a proximate result thereof.”). The test is whether a defamatory meaning appears from the language itself without the necessity of explanation or the pleading of extrinsic facts.” *Barnes-Hind, Inc. v. Superior Ct.*, 181 Cal. App. 3d 377, 384–85 (1986). “If . . . a reader would perceive a defamatory meaning without extrinsic aid beyond his or her own intelligence and common sense, then . . . there is a libel per se.” *Id.* at 386–87. (Stossel did indeed plead special damages, so his claim survives regardless. *See* Section IV.B.5, *infra*.)

There are no outside facts to which a reader must be privy in order to glean the defamatory meaning of Science Feedback’s speech. Readers who come upon Stossel’s videos see the “missing context” and “partly false” fact-checking labels affixed to the Fire Video and the Alarmism Video. The implication is glaringly obvious: that a reader should not trust Stossel’s videos to be truthful. Science Feedback’s argument that a reader must “attribute certain statements of [Stossel]’s sources to [Stossel]” in order for there to be a defamatory meaning, Motion at 20, misses the point entirely: a reader who sees the fact-checking label affixed to either video will necessarily infer the defamatory meaning, *even without watching the video*. The defamatory meaning — that Stossel’s reporting is not credible — is per se libelous. *See AK Futures v. Limitless Trading Co., LLC*, No. SACV21CV01154JVSADSX, 2021 WL 5238588, at *4 (C.D. Cal. Oct. 6, 2021) (“[Defendant] is accusing [Plaintiff] of selling fake products. No extrinsic information is required to understand that meaning. Accusations that a company is selling fake products, an act of dishonesty, has a natural tendency to injure its business reputation.” (citation omitted)).

Science Feedback relies on *Song fi Inc. v. Google, Inc.*, 108 F. Supp. 3d 876 (N.D. Cal., 2015), Motion at 20, but *Song fi* actually highlights why Science Feedback *did* engage in defamation per se. In *Song fi*, the court explained that when YouTube published a notice that a “video has been removed because its content violated YouTube’s Terms of Service,” an “average reader” could only appreciate the alleged defamatory meaning of the notice if “the average viewer knew that pornography and obscenity, among other things, were prohibited by YouTube’s Terms of Service,” and the “Terms of Service and their prohibitions are not ‘matters of common knowledge rationally attributable to all reasonable persons.’” *Song fi Inc.*, 108 F. Supp. 3d at 888–89 (citation omitted). Again, a reader need

1 not even watch Stossel’s video, let alone read a separate extrinsic document, to understand that
 2 Science Feedback defamed Stossel through its fact-checking labels.

3 **4. California’s Correction Statute Does Not Bar Stossel’s Claim**

4 Science Feedback attempts to seek refuge in California’s Correction Statute, which limits a
 5 plaintiff to special damages in “any action for damages for the publication of a libel in a daily or
 6 weekly news publication, or of a slander by radio broadcast,” unless a notice and demand for
 7 correction is served upon the publisher within “20 days after knowledge of the publication or
 8 broadcast.” Cal. Civ. Code § 48a(a). The Correction Statute has no effect on Stossel’s claim because
 9 Science Feedback is not a type of publication that the Correction Statute protects. Even if the
 10 Corrections Statute applied, Stossel nonetheless complied with it. And in any event, Stossel pleaded
 11 special damages. *See* Section IV.B.5, *infra*.

12 **a. The Corrections Statute does not apply to Science Feedback**

13 Climate Feedback is a “fact-checking website[.]” Compl. ¶ 25. The Corrections Statute defines
 14 “[d]aily or weekly news publication” as “a publication, either in print or electronic form, that contains
 15 *news* on matters of public concern and that publishes at least once a week.” Cal. Civ. Code § 48a(d)(5)
 16 (emphasis added). Science Feedback relies on the legislative history of the statute and case law
 17 interpreting the journalist’s Shield Law in order to argue that the Corrections Statute should cover
 18 Climate Feedback because it gathers a “particular kind of information.” Motion at 22.

19 The word “news,” however, is not mere surplusage, and, as the legislative history of the
 20 Corrections Statute reveals, is an integral part of the statute. Indeed, Assembly Bill 998 (which created
 21 the Corrections Statute) stated that its intent was to protect online publications that “perform the same
 22 news-disseminating function as a daily newspaper.” A.B. 998 § 1, 2015 Leg. (Cal. 2015) (Dkt. No. 50-
 23 8 at 2). The legislature’s intent was to “protect enterprises engaged in the *immediate dissemination of*
 24 *news* on matters of public concern, insofar as time constraints do not reasonably permit such
 25 enterprises to check sources for accuracy and stories for inadvertent error.” *Id.* (emphasis added). The
 26 Senate Judiciary Committee’s report confirms that protection should “extend to online publications
 27 and weekly newspapers, which publish *breaking news on deadlines indistinguishable from daily*
 28 *newspapers*.” S. Rep. A.B. 998 at 6 (Cal. 2015) (Dkt. No. 50-8 at 11) (emphasis added). And the

1 Assembly Judiciary Committee’s report explains that the policy rationale for the limitation in the
 2 Corrections Statute “is that a publication should verify factual allegations before publishing, *unless*
 3 they operate under deadline pressures that make verifying every fact and correcting every inadvertent
 4 error impracticable.” A. Rep. A.B. 998 at 6 (Cal. 2015) (Dkt. No. 50-8 at 16).

5 Science Feedback does not engage in the immediate dissemination of breaking news operating
 6 on deadlines similar to daily newspapers. Instead, by its own admissions, “Climate Feedback editors
 7 select certain broad claims that are gaining traction on social media and subsequently turn to their
 8 network of outside experts and scientists,” who then “review and comment on the article,” after which
 9 “a Climate Feedback editor summarizes the findings and publishes the findings in an article[.]” Motion
 10 at 4. Science Feedback’s work, in short, is nothing like the publications the Correction Statute protects.
 11 Science Feedback does not report *news*, and certainly does not do so on an immediate basis. At a
 12 minimum, whether Science Feedback is protected by the Correction Statute requires factual analysis
 13 beyond the four corners of the Complaint that would be inappropriate at this stage.

14 **b. Stossel complied with the Corrections Statute**

15 Even if the Court were to find that a website that published articles “fact-checking” others’
 16 statements (or as in this case, statements not actually made) was a news publication under the
 17 Correction Statute, Stossel nonetheless alleges facts showing that he complied with the Correction
 18 Statute. Stossel “made significant efforts to bring to Defendants’ attention the falsity of their
 19 statements about the Fire Video[.]” Compl. ¶ 59. These efforts included emailing Climate Feedback
 20 editor, Nikki Forrester, about the falsity of the label, with no response (*id.*);² speaking with two of the
 21 three designated scientist reviewers for Climate Feedback about the falsity of the label, without any
 22 correction (*id.* ¶ 60); and again emailing Ms. Forrester to “repeat[] the request that Defendants’ false
 23 attribution and associated false labels be corrected,” to no avail. *Id.* ¶ 67. Incredibly, after all of these
 24 correction demand efforts, Climate Feedback not only failed to correct, but doubled down by
 25 publishing a Response Page that *blamed* Stossel for having contacting its editor and scientist reviewers

26 _____
 27 ² Should the Court require, Stossel can amend to plead *additional* facts showing compliance with the
 28 Correction Statute, including that the president of Stossel TV sent an email on September 29, 2020
 (just seven days after the Fire Video was published) to Climate Feedback editor Nikki Forrester
 stating, “we would appreciate your help in getting [the fact check warning] removed.”

1 to demand corrections. *Id.* ¶ 74. Stossel took equal efforts to obtain correction of his Alarmism Video,
2 also to no avail. *See id.* ¶¶ 92–93.

3 **5. Stossel Pleads Special Damages**

4 Stossel is not required to plead special damages: he stated a claim for defamation per se that is
5 not subject to the Correction Statute. Even if the Court disagrees with Stossel as to either point,
6 Stossel’s defamation claim is still actionable because he sufficiently alleges facts showing special
7 damages. In the Correction Statute, the legislature defined special damages as “all damages that
8 plaintiff alleges and proves that he or she has suffered in respect to his or her property, business, trade,
9 profession, or occupation, including the amounts of money the plaintiff alleges and proves he or she
10 has expended as a result of the alleged libel, and no other.” Cal. Civ. Code § 48a(d)(2); *see also* §
11 45(a) (“Special damage is defined in Section 48a of this code.”). “[A] business loss suffered by the
12 plaintiff as a result of damage to her reputation’ is ‘the classical definition of special damage in
13 a defamation case.’” *Gallagher v. Philipps*, No. 20-CV-993 JLS (BLM), 2021 WL 4428996, at *16
14 (S.D. Cal. Sept. 27, 2021) (quoting *O’Hara v. Storer Commc’ns, Inc.*, 231 Cal. App. 3d 1101, 1112
15 (1991)) (brackets in original).

16 Stossel alleges that his “business model has relied on reaching audiences through social media
17 platforms,” and that as a result of the defamatory fact-checks, “Facebook has reduced *all* distribution
18 of Stossel’s video reporting, and has limited the number of individuals who will see his content on
19 Facebook.” Compl. ¶¶ 101–02. Science Feedback’s defamation therefore harmed Stossel in the form
20 of “reduced distribution of his reporting, reduced viewership, and reduced profits from advertising
21 revenue from his viewership.” *Id.* ¶ 103. Indeed, after Science Feedback defamed Stossel with its fact-
22 check of the Alarmism Video, Stossel’s advertising revenue fell from “approximately \$10,000 a month
23 to approximately \$5,500 a month” because of the “dramatic drop in both views of that video and all
24 Stossel’s other videos[.]” *Id.* ¶ 105. Stossel further lost advertising revenue he would have earned from
25 the Fire Video, which had already accumulated 1.2 million views before Stossel was defamed. Stossel
26 therefore sufficiently states entitlement to special damages. *See Kanarek v. Bugliosi*, 108 Cal. App. 3d
27 327, 337 (1980) (“Plaintiff’s pleading of a reduction in the number of new clients and a loss of clients
28 is a sufficient pleading of special damages for purposes of Civil Code section 48a.”). And contrary to

Science Feedback’s argument, Stossel alleges that Science Feedback’s defamation was the proximate cause of these damages as its defamatory statements directly resulted in the throttling of Stossel’s Facebook page, and the subsequent decline in views and advertising revenue.

6. Stossel Alleges Actual Malice

Stossel further satisfies the constitutional standard of actual malice. Presuming for the sake of Science Feedback’s Motion that Stossel is a public figure or limited purpose public figure, to prove a defamation claim he must prove actual malice under the standard first articulated in *New York Times Co. v. Sullivan*, 376 U.S. 254 (1964). “In this context, a defendant acts with ‘actual malice’ when publishing a knowingly false statement or where he ‘entertained serious doubts as to [its] truth.’” *Christian Research Institute v. Alnor*, 148 Cal. App. 4th 71, 81 (2007) (quoting *Reader’s Digest Ass’n v. Superior Ct.*, 37 Cal. 3d 244, 256 (1984)). Further, a plaintiff can establish actual malice by “showing that the defendant lacked reasonable ground for belief in the truth of the publication[.]” *MacKinnon v. Logitech Inc.*, Civ. No. 15-cv-05231-TEH, 2016 WL 2897661, at *4 (N.D. Cal. May 8, 2016).

Stossel alleges facts making it clear that Science Feedback acted recklessly (at least) and without a reasonable basis when it affixed its defamatory labels to Stossel’s content. Science Feedback attributed to him a claim he never made in the Fire Video (i.e., that climate change does not cause forest fires), and on this sole, faulty ground, it was labeled, “missing context.” Compl. ¶ 45. Science Feedback lacked reasonable grounds for belief in the truth of its statements, including because it failed to identify any false facts in Stossel’s report, *id.* ¶ 70, and did not bother even to watch the Fire Video before publishing its false attribution and label. *Id.* ¶¶ 58, 60. Indeed, Science Feedback — including via Climate Feedback scientist reviewers Stefan Doerr and Zeke Hausfather — conceded that its statements were *not* fairly applied to the Fire Video, *id.* ¶ 62, and further conceded that “if this [the label] is implying that we have reviewed the video, then this is clearly wrong, there’s something wrong with the system.” *Id.* ¶ 60–61. Yet despite all of this, after Stossel’s agent asked Defendants to correct the false attribution and label — including via a request he made to Climate Feedback editor Nikki Forrester — Defendants refused to correct their mistakes. *Id.* ¶¶ 67–68. These allegations amply

1 establish malice, as Science Feedback published (and continues to publish) false statements, either
 2 knowing them to be false or lacking a reasonable ground for belief in their truth.

3 Stossel alleges that Science Feedback labeled the Alarmism Video as “partly false” without
 4 identifying a single false fact in Stossel’s report. Compl. ¶¶ 85–86. Science Feedback’s own scientist
 5 reviewers conceded that their label was wrongly applied to Stossel’s report, including by confirming
 6 that the label was *not* based on “specific ‘facts’ being ‘wrong’” but instead was applied because
 7 “broader claims are being disputed” and Stossel’s reports apparently had the wrong “ton[e],” and by
 8 acknowledging that “it’s wrong [Stossel was] criticized” for reciting a true fact about observed trends
 9 in hurricane strength. *Id.* ¶¶ 92–95. Once again, Science Feedback failed to remove their false label,
 10 after being notified of its falsity. *Id.* ¶¶ 96–100. These allegations are sufficient to establish malice on
 11 a Rule 12 posture, as it is well-pled that Science Feedback published false statements, either knowing
 12 them to be false or lacking a reasonable ground for belief in their truth.

13 Science Feedback’s arguments regarding actual malice miss the point entirely. This is not a
 14 lawsuit about a “disagree[ment] on scientific opinion.” Motion at 24 (internal quotation marks
 15 omitted). Thus, Science Feedback’s arguments about the scholastic quality of its fact-checking articles
 16 are totally irrelevant. Science Feedback has every right to disagree with Stossel about complex and
 17 unresolved scientific matters. The problem is that Science Feedback imposed negative fact-checks to
 18 Stossel’s content based on claims he did not make in a video its reviewers did not watch (the Fire
 19 Video), and without identifying a single misstatement of fact (the Alarmism Video). In an effort to
 20 distract from its recklessness in mislabeling a video before watching it (a fact that is addressed
 21 nowhere in Science Feedback’s actual malice section), Science Feedback instead editorializes about
 22 the quality of its reviews and its thoroughness in writing them. Even if the Court were to go beyond
 23 the four corners of the Complaint to consider outside facts about Science Feedback’s review process,
 24 which it should not, it was nonetheless reckless of Science Feedback to deem the Fire Video “missing
 25 context” before watching it and after acknowledging that the label was improper, and reckless to deem
 26 the Alarmism Video “partly false” despite being unable (and remaining unable) to point to a single
 27 misstatement of fact therein.

28 //

V. CONCLUSION

For the foregoing reasons, Plaintiff John Stossel respectfully requests that the Court deny Science Feedback's Motion to Dismiss and Anti-SLAPP Motion, in full. If the Court grants Science Feedback's Motion in any part, Stossel asks the Court for leave to amend to cure any pleading deficiencies.

Respectfully submitted,
